

# Final Project: From Methodology to Execution

Digital Project Management

## Step 1) Study the Scenario

#### Overview

You are a project manager for Yosemite, an eCommerce company that integrates brick-and-mortar stores onto its platform for a fee. It's the third Tuesday in September; you have been assigned to work with The Stefano Shop, a family-run business that had been a local success but was struggling to stay open. The primary business goal is to digitize the store's operations and sales and complete this project a week before Christmas in the U.S.

Integrating The Stefano Shop onto Yosemite means building the following features: a storefront on the platform, a social media integration, and a recommendation engine. The Stefano family, which consists of Papa Stefano, Mama Stefano, and Junior Stefano, will also require the training and knowledge to operate their digital store once it has been developed.

At Yosemite, you have access to the Engineering, Vendor Management, and Marketing teams. The Engineering team will need up-to-date information on the store's inventory from the customer. The Vendor Managers can onboard and train whoever will manage the storefront on Yosemite's platform. The Marketing team can set up the social media channels but will have to hand off the account's ongoing management to someone at the Stefano's.

### **Project Budget**

The Yosemite storefront, training, and documentation can be delivered for \$15,000 - a tight budget for the Stefano's. So Papa Stefano asked that you include a cost-benefit analysis in the project scope to reassure him this is a good investment.

For the cost-benefit analysis, your research shows:

- The Stefano Shop's current annual revenue is \$120,000
- The eCommerce industry discount rate is 7%
- Yosemite promises a 30% increase in revenue (\$36,000)
- And the cost of this project will be \$15,000 upfront

### Getting the Job Done

The Engineering team has to deliver three main features: the storefront, social media integration, and a recommendation engine. Each of those features can be completed in a two-week sprint. The tasks involved in each sprint are design, build, test, and release. You, as the project manager, can recommend building out

all features before the store goes live on Yosemite. Or you can recommend releasing a minimum viable product—a live storefront—then later adding the other features: the social media integration and a recommendation engine.

The Vendor Managers, as part of the storefront deliverable, have the task of inputting all inventory data. That task would take a week and is dependent on the Engineering team completing the first deliverable. Then the Vendor Managers will spend a week onboarding and training the Stefano's on how to use the Yosemite platform. This task should occur before the store goes live. During or after the recommendation engine deliverable is released, the Vendor Managers will have to create a custom sales report that is automatically sent to the Stefano's with results on how the recommendation engine impacts sales. It takes a week to set up the automated report.

The Marketing team is tasked with creating the social media channels and handing off its ownership to Stefano's, which takes a week. But this task must occur before Engineering's second feature: social media integration.

### The Cast of Characters

- **Papa Stefano** store co-founder; Papa Stefano has a strong presence in the family business but listens to Mama Stefano while making a business decision. He manages the floor and is averse to new technology. While he understands it's time to modernize the shopping experience and would like to gain new customers, he's wary of going over budget.
- Mama Stefano store co-founder and certified accountant; she keeps spreadsheets to track
  inventory and has convinced Papa to work with Yosemite. Her primary focus is on back-end
  administrative tasks of the business. Mama is more concerned about getting the store ready in time
  for Christmas shoppers.
- **Junior Stefano** The Stefano daughter is a student and is still learning the family business. She hopes to take over the family business one day; Junior creates social media posts on her own accounts for the store. She sees value in taking full advantage of Yosemite's services.
- **Moe** the Yosemite Vendor Manager tends to be enthusiastic about upselling customers with additional services; not mindful of budget. Moe primarily focuses on promoting and coordinating Yosemite's services, which constitutes a part of the overall project. Additionally, this project is one of many he works on.
- Aliyah the Yosemite Engineering Lead is experienced and skilled. She prefers to work in Agile
  sprints but understands that not all customers can keep up with that pace. Her expertise in
  developing and implementing technical solutions enables her to guide the project's timeline and
  execution strategy, making her vital in determining the project's overall direction and progress.
- **Taylor** the Yosemite Marketing Manager tends to take on too many assignments and can delay getting tasks completed. Taylor often needs to be informed of their assignments ahead of time. His role and contributions are limited to providing support for the implementation of marketing plans for this project.
- **Lou** the Yosemite Small Business Program Manager oversees all accounts that fall under the Small Business category; You report directly to Lou. Lou only keeps a high-level overview of this project and its progress. He wants to showcase your project to the entire company if all goes well and expect regular communication, especially when things go wrong.

### Step 2) Write a Project Scope

The project scope consists of the following sections: business objectives and project value, deliverables and milestones, a timeline, resources, costs, and a proposed methodology. Use the above scenario to identify the information relevant to the project scope.

In three to four sentences, describe the business objectives for Yosemite and for the customer, The Stefano Shop. Yosemite's mission is to digitally transform The Stefano Shop by providing a functional online storefront, social media integration, and a recommendation engine. The primary goal is to boost The Stefano Shop's revenue by 30% (\$36,000) through modernization. This involves training the Stefano family to effectively manage their digital store and engaging the Engineering, Vendor Management, and Marketing teams. The Stefano Shop aims to enhance operational efficiency, revenue, and succession planning by leveraging Yosemite's platform and expertise.

# List project milestones and deliverables.

Project Milestones and Deliverables:

- 1. \*\*Milestone: Project Kickoff and Requirements Gathering\*\*
- Deliverable: Detailed project scope, requirements, and cost-benefit analysis.
- 2. \*\*Milestone: Storefront Development and Training Preparation\*\*
  - Deliverable: Functional online storefront on Yosemite's platform.
  - Deliverable: Inventory data input by Vendor Managers.
- Deliverable: Training materials and documentation for the Stefano family.
- 3. \*\*Milestone: Social Media Integration and Marketing Setup\*\*
- Deliverable: Social media channels created by Yosemite Marketing team
- Deliverable: Ownership transfer of social media accounts to Stefano family.
  - Deliverable: Integration of social media features with the storefront.
- 4. \*\*Milestone: Recommendation Engine Implementation\*\*
- Deliverable: Functional recommendation engine integrated into the storefront.
  - Deliverable: Custom sales report setup by Vendor Managers.
- 5. \*\*Milestone: Store Launch and Ongoing Support\*\*
- Deliverable: Official launch of The Stefano Shop on Yosemite's platform.
- Deliverable: Onboarding and training of Stefano family by Vendor Managers.
- Deliverable: Automated sales report showing recommendation engine impact.
- 6. \*\*Milestone: Project Review and Showcase\*\*
- Deliverable: High-level overview of project progress for company showcase.

# What resources as the project manager do you have to complete the project?

As the project manager for this initiative, you have access to the following key resources within Yosemite:

- 1. Engineering Team (Led by Aliyah).
- 2. Vendor Management Team (Led by Moe).
- 3. Marketing Team (Led by Taylor).
- 4. Financial Resources\*\*:
- Budget allocation of \$15,000 for the project's development, training, and documentation.
- Cost-benefit analysis to demonstrate the potential return on investment to Papa Stefano.
- 5. Documentation and Training Materials\*\*:
- Resources to create comprehensive training materials and documentation for the Stefano family to operate the digital store effectively.
- 6. Project Management Tools and Software.
- 7. Project Oversight (Lou).

Do the Cost-Benefit Analysis. Write out the formula, show the steps to get the cost-benefit ratio, and state whether the investment is positive or negative.

#### Given Data:

- Current annual revenue of The Stefano Shop: \$120,000
- Expected increase in revenue (benefit) due to Yosemite integration: 30% \* \$120,000 = \$36,000
- Project cost: \$15,000
- Discount rate: 7%

Step 1: Calculate Present Value of Expected Benefit (Future Benefit / (1 + discount rate)^n):

Present Value of Expected Benefit =  $$36,000 / (1 + 0.07)^1$ Present Value of Expected Benefit =  $$36,000 / 1.07 \approx $33,644.86$ 

Step 2: Calculate Present Value of Project Cost (Future Cost / (1 + discount rate)^n):

Present Value of Project Cost =  $15,000 / (1 + 0.07)^1$ Present Value of Project Cost =  $15,000 / 1.07 \approx 14,018.69$ 

Step 3: Calculate Cost-Benefit Ratio (Present value of expected benefit / Present value of project cost):

Cost-Benefit Ratio =  $$33,644.86 / $14,018.69 \approx 2.40$ 

Result: The calculated cost-benefit ratio is approximately 2.40.

	Interpretation: A cost-benefit ratio greater than 1 indicates a positive investment. In this case, the cost-benefit ratio is 2.40, meaning that for every dollar invested, the project is expected to generate \$2.40 in present value of expected benefits. Therefore, the investment in integrating The Stefano Shop onto Yosemite's platform is positive and likely to provide a favorable return on investment.
What are the minimum and the maximum number of weeks required to complete the project?	Tasks and Durations:  Storefront Development and Training Preparation: Storefront Development: 2 weeks Inventory Data Input: 1 week Training Materials and Documentation: Ongoing (assuming 1 week for initial setup) Social Media Integration and Marketing Setup: Social Media Channels Creation: 1 week Ownership Transfer of Social Media Accounts: 1 week Recommendation Engine Implementation: Recommendation Engine Integration: 2 weeks Custom Sales Report Setup: 1 week Store Launch and Ongoing Support: Official Store Launch: 1 week Automated Sales Report Setup: 1 week Automated Sales Report Setup: 1 week The minimum duration for project completion is 9 weeks, accounting for critical tasks including storefront development, recommendation engine integration, and essential training and setup phases. This path encompasses tasks that must be sequentially completed without overlap. In a more extended timeline, the maximum duration could extend up to 12 weeks, considering additional steps such as social media integration, comprehensive documentation, and account ownership transfer. Actual completion times may vary due to unforeseen challenges and resource availability.
What methodology do you propose to use for organizing the project: Waterfall or Agile? Explain your answer.	Agile methodology is recommended for this project. Its iterative approach aligns with phased tasks like storefront development and integration, enabling flexibility and adapting to evolving requirements. Agile's collaboration and stakeholder involvement ensure alignment, while its incremental progress supports a faster launch, risk mitigation, and responsiveness to Papa Stefano's concerns.
What kind of meetings will you have with stakeholders and how	Based on the Agile methodology chosen for the project, the following types of meetings with stakeholders will be conducted regularly:

often? Explain your answer based on the project methodology you have chosen.

- 1. \*\*Sprint Planning Meetings:\*\* These meetings occur at the beginning of each sprint (e.g., two-week intervals) and involve stakeholders such as Papa Stefano, Mama Stefano, and Junior Stefano. The team discusses the upcoming tasks, priorities, and goals for the sprint. The Stefano family's input helps ensure alignment with their vision and requirements.
- 2. \*\*Daily Stand-up Meetings:\*\* Short daily meetings involve the project team and stakeholders like Papa Stefano. Each member provides updates on progress, challenges, and plans for the day. Papa Stefano's presence allows quick decision-making and addressing any concerns promptly.
- 3. \*\*Sprint Review Meetings:\*\* At the end of each sprint, a review meeting is held to demonstrate the completed work to stakeholders. Papa Stefano, Mama Stefano, and Junior Stefano can provide feedback, ensuring that the delivered features meet their expectations and allowing adjustments as needed.
- 4. \*\*Sprint Retrospective Meetings:\*\* These meetings follow the sprint review and involve the project team, including stakeholders. Participants reflect on the sprint's successes and challenges, discussing improvements for the next sprint. The Stefano family's input is valuable for enhancing collaboration and processes.
- 5. \*\*Ad Hoc Meetings:\*\* As needed, additional meetings can be scheduled to discuss specific topics, address urgent issues, or make decisions requiring stakeholders' input. Papa Stefano's participation ensures that important decisions align with his cautious approach.

The Agile methodology encourages frequent and open communication with stakeholders throughout the project. Regular meetings ensure that the Stefano family is actively engaged, providing input, making decisions, and staying informed about progress. This iterative interaction allows for continuous adjustments, aligns the project with stakeholders' needs, and ensures a successful integration onto Yosemite's platform.

# Step 3) Identify Your Stakeholders and Team

Classify the influence level and amount of authoritative power of each stakeholder as either high or low. Then accordingly, explain how you plan to engage this stakeholder and how they might affect the project in a negative or positive way. Your assumptions should, at a minimum, reference the profiles in *The Cast of Characters* section in Step 1.

### Power-Influence Classification Grid

Stakeholder	Estimated Project Influence ("High" or "Low")	Estimated Project Importance ("High" or "Low")	Assumptions and Risks	Engagement Plan
Aliyah, Engineering Manager	High	High	Positive: Aliyah's expertise and guidance can drive efficient development, timely feature delivery, and successful technical implementation.  Negative: Miscommunication or lack of engagement could lead to technical challenges or delays	Collaborate closely with Aliyah in sprint planning, review meetings, and retrospectives to ensure technical alignment and progress tracking.
Papa Stefano	high-Papa Stefano's strong presence in the business and decision-making role indicate his significant influence over project direction and decisions.	HighPapa Stefano's position as a co-founder and decision-maker grants him the authority to make critical choices regarding	Positive: Papa Stefano's strong influence can drive support and decision-making. His involvement can ensure the project meets the family's expectations and results in a	Regularly involve Papa Stefano in sprint planning, review meetings, and retrospectives to gather his input and ensure alignment with project goals. Provide clear explanations of the benefits and ROI to

		budget and project direction.	successful digital transformation.  Negative: Overemphasis on budget constraints may lead to resistance toward additional features or changes that could enhance the project's success.	address his budget concerns.
Mama Stefano	High- has high influence on papa stefano	low-Her role, while important, might have less authoritative power compared to others when it comes to high-level decisions.	Positive: Mama Stefano's involvement can ensure that backend administrative aspects are effectively addressed, leading to increased operational efficiency and successful project outcomes.  Negative: If not adequately engaged, her concerns about project timing and readiness for Christmas shoppers could lead to rushed decisions or overlooked details.	Maintain ongoing communication with Mama Stefano through regular updates and status reports. Emphasize how the project's success will streamline backend tasks, allowing her to focus more on administrative duties and supporting her importance in these areas.
Junior Stefano	low	low	Positive: Junior Stefano's enthusiasm for social media and interest in embracing new technology can contribute positively to the project's online presence and customer engagement.	Keep Junior Stefano engaged through regular updates, involve her in social media integration discussions, and consider her feedback on modernizing the shopping experience.

			Negative: If not adequately engaged, her insights may be overlooked, potentially affecting the project's effectiveness in reaching a younger audience	
Moe, Vendor Manager	high-Moe's enthusiasm and eagerness to upsell indicate a potentially significant influence on introducing additional services to the project.	low-Moe's role focuses on promotion and coordination rather than high-level decision-making, leading to lower authoritative power.	Positive: Moe's enthusiasm for upselling additional services can bring innovative ideas to enhance the project's features and offerings.  Negative: Overemphasis on upselling could lead to budgetary concerns and the potential for scope creep.	Maintain regular communication with Moe, provide updates on project progress, and ensure that he understands the Stefano family's priorities
Taylor, the Marketing Manager	low-Taylor's role in marketing contributes to project success but might have lower influence compared to roles directly tied to project execution.	low-Taylor's role might involve executing marketing plans rather than high-level decision-making.	Positive: Taylor's marketing input can contribute to a well-rounded digital storefront and social media strategy.  Negative: Inadequate involvement may result in missed opportunities for strategic marketing initiatives.	Keep Taylor informed about the project's marketing-related aspects, especially social media integration, and gather insights for effective customer engagement.
Lou, the Program Manager	low-Lou's role as a Small Business Program Manager might involve overseeing multiple projects, potentially leading to a	high-Lou's high-level overview role grants him authoritative power to showcase and	Positive: Lou's support and visibility can help showcase the project's success within the company and promote effective	Provide regular updates to Lou on project progress, align with his high-level overview expectations, and seek his support for

	relatively lower influence over individual project details.	communicate project outcomes at a company-wide level.	communication channels.  Negative: Lack of engagement with Lou could result in insufficient visibility and support for the project's achievements.	communication within the company.
Me, the Project Manager	high-responsible for making recommendations, coordinating tasks, and ensuring the project's success, which indicates a substantial influence over project decisions and outcomes	high-responsible for setting project priorities, resolving conflicts, and ensuring that the project stays on track to meet its objectives within the given constraints.	I would provide strong leadership and direction to ensure effective coordination among the teams and stakeholders, leading to streamlined project execution and successful outcomes.	

Create a RACI chart for the project. It will break down the deliverables from the project scope into tasks, but you will have to show who should be responsible, accountable, consulted, and informed for each row.

### **RACI Chart**

Hint: The Accountable (A) and Responsible (R) stakeholders are the same person for all tasks, except "Engage stakeholders"

	Stakeholders				
Tasks	Me, Project Manager	Lou, Program Manager	Taylor, Marketing Manager	Moe, Vendor Manager	Aliyah, Engineering Manager
Build storefront	С	С	1	С	RIA
Input Inventory Data	С	С	I	RIA	С
Build social media integration	С	С	С	1	RIA
Train Stefano's on platform	С	С	I	RIA	С
Create social media channels	С	С	RIA	С	С
Train Stefano's on social media use	С	С	RIA	R	С
Build recommendation engine	С	С	I	I	RIA
Create Automated Sales Report	С	С	1	RIA	С
Engage stakeholders	R	А	С	С	С

### Step 4) Create a Project Plan

In this step, you will reference the project scope, stakeholder analysis, and RACI chart to create a project plan for the proposed methodology.

Build a model of your plan for managing the Yosemite project. It should be a snapshot in the planning phase of the project. You can use the dates in your current year when creating the project plan.

Display this model in one of the two frameworks, a Gantt chart for Waterfall or a Scrum board for Agile. After you pick one model, be sure to include the information outlined in your project scope, stakeholder analysis, and RACI chart:

- Deliverables
- Tasks
- Assignments
- Schedule and order of tasks

### Additional Instructions for a Waterfall Project Plan

If you choose a Waterfall project plan in Step 2, you should include tasks related to stakeholder engagement, team management, and closure activities. Assume that each additional task can take 1-3 days to complete, so it will affect your schedule. The additional tasks are

- A kickoff meeting,
- Scheduled status reports, and
- Documenting knowledge.

Create a **Gantt chart** for your project by filling in the *Gantt Chart Template* provided in the classroom. Export or save the spreadsheet as a .xls or .xlsx file. Add this spreadsheet to your project submission folder.

### Additional Instructions for an Agile Project Plan

If you choose an Agile project plan in Step 2, you should organize the columns using Scrum phases:

- Sprint Planning
- Backlog
- Work In Progress
- QA
- Release
- Sprint Review

Include relevant tasks that occur in the initial and end phases of a Sprint. Those tasks include:

- Creating a Lessons Learned document
- Adding features to a backlog
- Presenting demos
- Adding tasks to a sprint
- Emailing status reports
- Reviewing Lessons Learned
- Creating documentation for a demo
- Hosting a Retrospective meeting

Create a new **Scrum board** on Trello and make it public.

- To make your board public, click on Private > Change Visibility: Public > "Yes, make board go public".
- To grab the public URL, go to Show Menu > ... More > Link to This Board.

Paste the URL here:

https://trello.com/b/muFOfm0J/udacity

### Step 5) Analyze Risk and Select Response Strategy

#### Risk Scenario 1

The Stefano Shop project relies on the customer providing Yosemite with information on all products in its inventory. The Vendor Manager has reported that the Stefano's have not delivered that information when requested due to their analog way of handling inventory. They promised to deliver the inventory information in a few more days.

# How might this risk affect the project?

- Project Schedule Impact: The project timeline could be disrupted
  if the inventory data is not provided promptly. This delay might
  lead to a cascading effect, pushing back subsequent tasks and
  potentially affecting the overall project deadline.
- Integration Challenges: The Engineering team relies on up-to-date inventory information to build the storefront and integrate features effectively. Without this data, development and testing tasks could be delayed or even stalled.
- Resource Bottleneck: If the inventory data is delivered late, it
  might create a bottleneck for the Vendor Managers who need to
  input the data into the platform. This could lead to a rush and
  potential errors in data entry.
- Testing and Quality Assurance: Without accurate inventory information, testing and quality assurance processes might be compromised. Testing the recommendation engine's impact on sales, for instance, could be inaccurate if the inventory data is incomplete.
- Client Satisfaction: Papa Stefano, Mama Stefano, and Junior Stefano could become frustrated if the project encounters delays due to their inability to provide necessary inventory data. This could impact their satisfaction with the project's progress.
- Budget Concerns: If the delay continues, the project's budget might be affected. Additional resources could be needed to expedite tasks or address any resulting issues, potentially exceeding the initially allocated funds

Which of these Risk Response Strategies would you have chosen if you had anticipated the risk prior to initiating the project: Avoid, Mitigate, Transfer, Actively Accept, Passively Accept, Escalate. Explain how you would apply the strategy. The risk of delayed inventory information delivery from The Stefano Shop would be best addressed using a combination of the "Mitigate" and "Actively Accept" risk response strategies.

Mitigate: To mitigate the risk, the project manager should take proactive steps to minimize the impact of the potential delay. This could involve working closely with the Vendor Managers and Engineering team to develop a contingency plan. The plan might include allocating additional resources or adjusting the project

schedule to account for potential delays. By identifying and addressing potential bottlenecks, the project manager can reduce the likelihood of major disruptions if the inventory data is not delivered on time.

### Risk Scenario 2

When the Engineering team began designing the recommendation engine—a feature that takes up 20% of the current budget—they informed you that the task was more complicated than anticipated. The

Engineering Manager said it would take a total of four weeks and cost an additional \$3,500 to upgrade the Al service that powers the recommendation engine. That fee would have to be covered by the customer. Or the recommendation engine feature could be dropped from the project.

# How might this risk affect the project?

- Budget Overrun: The project's budget could be exceeded due to the unexpected cost of upgrading the AI service. This might impact the overall financial feasibility of the project, potentially straining the resources allocated for other tasks.
- Timeline Extension: The additional four weeks required for the recommendation engine's design and implementation could lead to a delay in the project's overall timeline. This delay could have ripple effects on subsequent tasks, potentially affecting the project's completion date.
- Scope Change: If the customer is unable or unwilling to cover the
  additional cost for upgrading the AI service, there might be
  pressure to either drop the recommendation engine feature or
  find alternative solutions. This could impact the project's scope
  and the value proposition it offers to The Stefano Shop.
- 4. Stakeholder Expectations: The Stefano family, as stakeholders, might have expectations around the recommendation engine's functionality and benefits. A potential delay or feature drop could affect their perception of the project's success and its ability to meet their business needs.
- 5. Quality and Performance: Rushing or compromising the design and implementation of the recommendation engine due to time or budget constraints could result in reduced quality, potentially affecting its performance and impact on sales.

Which of these Risk Response Strategies would you apply to the above risk: Avoid, Mitigate, Transfer, Actively Accept, Passively Accept, Escalate. Explain how you would apply the strategy. For the risk scenario of a complex recommendation engine task requiring additional time and cost considerations, I would apply the "Mitigate" and "Transfer" risk response strategies.

Transfer: Given the option presented by the Engineering Manager to upgrade the AI service for an additional cost, the "Transfer" strategy can be applied. The project manager should discuss this cost with The Stefano Shop stakeholders, explaining the benefits of the upgraded AI service for the recommendation engine. If The Stefano Shop agrees to cover the additional cost, the risk of budget overrun is transferred to the customer. This approach allows the project to proceed with the desired feature while ensuring that the necessary resources are available to cover the expenses

# Step 6) Plan Knowledge Share and Report Project Status

### **Knowledge Documentation**

Throughout the project and before its closure, you asked the team to create documentation for the company Yosemite and the customers, the Stefano's. In your project plan, what documentation tasks did you include? List below what documentation tasks you came up with, who you assigned them to, how you scheduled them, and why it is important to document this task. Add more rows to the table if you see fit. Add these tasks to your project plan if you haven't already done so.

Task	Assignee	Deadline/Place in Timeline	Reason for Documenting This Task
Lesson learned document	Me	After sprint review	Captures insights for future project improvements
User Guide for Stefano's on Platform	Vendor Managers	Before storefront release	Helps Stefano's navigate and operate the platform
User Guide for Social Media Integration	Taylor	Before social media release	Aids Stefano's in using social media integration
Technical Documentation for Recommendati on Engine	Aliyah	Before recommendation engine release	Provides technical insights for future reference
Automated Sales Report Documentation	Vendor managers	Before report setup	Guides Stefano's in understanding report results
Project Summary Report	Ме	End of the project	Summarizes project outcomes for stakeholders

# Status Report

In the Monitor and Control phase of project management, it is your responsibility to track how well the project is going and report to stakeholders the project status.

Where in your project timeline did you schedule or add the task for creating and sending a status report?	In the project timeline, the task for creating and sending a status report is typically scheduled as a recurring task throughout the project's execution. Status reports are typically generated at regular intervals, such as weekly or bi-weekly, to provide stakeholders with updated information on the project's progress, accomplishments, challenges, and upcoming milestones	
How do you plan to communicate the report to stakeholders, and how often?	Frequency of Status Reports:	
now often:	<ul> <li>Bi-weekly updates for Papa Stefano, Mama Stefano, Junior Stefano, and Moe help maintain engagement without overwhelming them.</li> <li>Monthly reports for Lou provide a high-level view of project progress and align with his oversight responsibilities.</li> <li>Weekly updates for Aliyah and Taylor facilitate close coordination due to their involvement in ongoing tasks.</li> </ul>	
	Method of Communication:	
	<del></del>	
	<ul> <li>In-person or virtual meetings provide an opportunity for direct interaction and immediate clarification.</li> <li>Email updates offer a formal way to share comprehensive reports, metrics, and highlights.</li> <li>Project management tools allow for real-time collaboration and tracking, supporting detailed discussions and document sharing.</li> </ul>	

Create two **status reports** using the *Status Report Template* provided in the classroom based on the risks described in Step 5.

- 1. The first status report should be created on the day you discovered the Stefano's did not deliver the inventory information to the Vendor Manager on time.
- 2. The second status report should be created in the middle of the Engineering team building the recommendation engine. That is when you were informed by the Engineering Manager that the project would be more time-consuming and costly.

# Project Status Report #1

PROJECT TITLE: Yosemite - The Stefano COMPANY NAME: Yosemite

Shop Integration DATE: 20-09-2023

PROJECT MANAGER: Ola Almallah

### **PROJECT SUMMARY**

The project involves integrating The Stefano Shop onto the Yosemite platform, digitizing their operations and sales.

### PROJECT HIGHLIGHTS/BLOCKERS
